

MCKAY CONANT HOOVER INC
Acoustics and Media Systems Consultants

This facility is approximately one-half of a 48,000sf facility completed in 1999 for approximately \$9.8M. It serves a very hands-on program offering degrees in Motion Picture and Television is the only one of its kind among the community colleges in Arizona. Students begin learning equipment and techniques from the first day of class from local, working professionals.

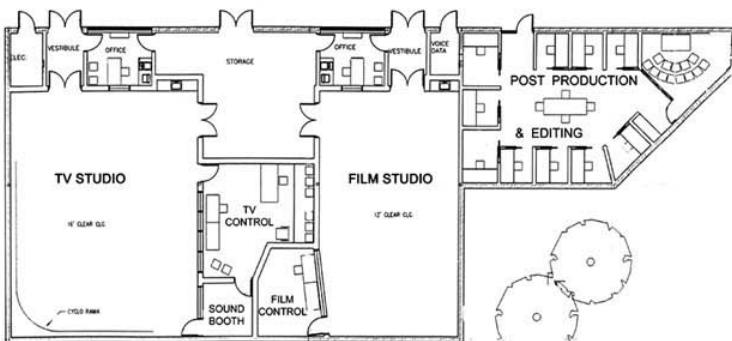

The MP/TV Department includes two studios. Studio A focuses on television production and is equipped with television production cameras with prompters, full video switching, professional news set, chroma-key wall, a Chyron character generator, DVC Pro-System with DV and DV compatibilities, 24 channel audio mixing, Ross professional switcher, complete stand lighting system with professional lights and assorted draperies. Studio B is a general purpose sound stage intended more for film/videography that includes full stand lighting systems and instruments and standard 5k overhead lighting. The room is used for class demos and student production shoots. MCH provided full-scope acoustical consulting and AV planning and infrastructure design.
