

MCKAY CONANT HOOVER INC
Acoustics and Media Systems Consultants

The Center for Media and Performing Arts Building at San Diego City College was completely renovated, finished in 2016 for \$19.9M, and achieved LEED Silver Certification.

The 31,000sf complex houses the Radio/TV/Film, Dance, Drama & Theater, and Music Departments, with key spaces including a television studio and control room, dressing rooms, multiple video editing suites, a full recording studio suite, music/instrument teaching spaces, and two dance studios. The project also renovated a portion of Building L across the common, to house a full radio station (KSDS Jazz 88.3 FM) with its own live-music studio.

City College offers more than 500 certificates, 180 majors and degrees, and 1,800 class selections. Students work in the newly renovated spaces to create, produce, and broadcast their student radio station, SDS Radio, and their Emmy-winning television news show, Newscene. State-of-the-art all-digital workspaces foster student learning of the latest audio/video technology available to industry professionals.

MCH provided full-scope acoustical and AV/media consulting.
