

MCKAY CONANT HOOVER INC
Acoustics and Media Systems Consultants

Clovis Community Medical Center serves the growing Clovis community with state-of-the-art facilities. This 390,000GSF, \$430M expansion included the construction of a new 148-bed tower, surgery/emergency department, and a two-story hospital entry structure.

There was special concern for speech privacy between patient rooms and from patient rooms to corridors. Also programmed were facilities with sensitive imaging equipment, such as a new MRI Room, Catheter Labs, and X-Ray Rooms. In addition to treatment spaces, the facility includes meeting rooms, conference rooms, and a visitor chapel.

MCH provided full-scope acoustical services.
