

MCKAY CONANT HOOVER INC  
Acoustics and Media Systems Consultants

Nestled in the heart of Downtown Los Angeles along Olvera and Alameda Street, the \$85M California Endowment Headquarters opened in 2006 and offers four stories of sustainable and innovative office space for one of the California's largest charitable organizations.

The 130,000sf LEED-certified building contains ground-floor publicly accessible spaces including a research library, gallery, and cafe. Other floors host numerous meeting rooms, training rooms, offices, food services facilities, and a conference center capable of splitting into two sections, or seating 500 as a single room. The center of the campus opens to a courtyard able to accommodate pre and post function activities.

The project team was awarded AIA Los Angeles "Building Team of the Year".

MCH provided full-scope acoustical and IT/AV/Security consulting services.
