Acoustics and Media Systems Consultants

The \$33.8M Cultural Center is home to three major elements: The Lewis Family Playhouse and Performing Arts Center, a second full-service Library for the City of Rancho Cucamonga, and Celebration Hall for meetings and banquets. Dedicated in August, 2006, the Lewis Family Playhouse is an intimate, state of the art, performing arts center with 560 seats on two levels. From professional, family-friendly theater productions to live concerts and comedy shows, the Playhouse offers something for everyone.

The complex comprises 90,000 square feet of energetic, vibrant space. Library spaces are designed to support an initial collection of 125,000 volumes and include a children's library and storytelling room, a multi-generational technology center, a young adult homework center, "teen scene", a literacy center, gift shop, and a quiet reading room—while the plan allows for a future second level expansion. Celebration Hall comprises 4,500 sf with the flexibility of sectioning up to three rooms for conferences, rehearsals and full catering. MCH provided full-scope acoustical planning and design services.
