

MCH

MCKAY CONANT HOOVER INC
Acoustics and Media Systems Consultants

This \$100M, 65,000sf facility dedicated to the research of neurological illnesses opened its doors to the first patients in late 2009. The Center, operated by the Cleveland Clinic, includes 13 examination rooms, offices for health care practitioners and researchers, a “Museum of the Mind,” and a community auditorium. It also serves as the headquarters for Keep Memory Alive, the Las Vegas Alzheimer's Association and the Las Vegas Parkinson's Disease Association. The Center is a national resource for the most current research and scientific information for the treatment of Alzheimer's, Parkinson's, Huntington's Diseases, and ALS as well as focusing on prevention, early detection and education. The facility operates as an outpatient treatment and research facility in downtown Las Vegas as part of the city's 61 acre Symphony Park. MCH provided full-scope acoustical design for this demanding project where the tenets of good acoustics, especially for the medical services portion, were severely tested by the severe geometries. Design by Gehry Partners.
